GARDEN 2025

DESIGN NATURE LIKE A PROFESSIONAL

The creation of the world. IT'S IN YOUR HANDS.

We humans have always been creators. We clear forests and plant new ones. We grow our food on a large scale, erect hedges for protection, pastures for livestock, and parklands as recreational areas and retreats. We are constantly changing our environment. We live with and from nature—and shape it with our own hands. They are our most important tools! Their protection is therefore essential. We live with and from nature – and shape it with our own hands. They are our most important tool! Their protection is therefore essential.

Harvesting what grows anew. IT'S IN YOUR HANDS.

In recent years, more and more people have re-discovered the joy of working with and creating things from nature: urban gardening, active climate protection, the organic boom, and self-sufficiency are the buzzwords of a rapidly growing future and lifestyle movement that now seeks and needs one thing above all else: professional quality and assistance.

Professional gardening gloves for the first time in professional quality. IT'S IN YOUR HANDS.

GEBOL, THE glove specialist in occupational safety for decades, has now applied its expertise and technological edge to develop professional gardening gloves that meet the highest quality standards. Whether wet or cold protection, suitability for tools, or comfort, special models have been developed for every working environment and application area—including “all-rounders.”

Clear orientation & gardening expertise. IT'S IN YOUR HANDS.

From Care & Plants to Winter & Forestry, we have developed five professional categories (see pages 4-5), whose color coding system provides an immediate overview and orientation. The individual models have botanical names, which also underscores our professional standards in the area of gardening/landscaping. A holistically designed concept—for more sales in the green sector!

Our future. IT'S IN YOUR HANDS.

We all play a part in shaping what our world will look like in the future. We are now clearing less land and reforesting more. We are increasingly farming organically and greening our cities to protect them from heat. We at GEBOL are also doing our part: we have further expanded our concept of upcycling gloves with the new GEBOL garden line. The world is a garden. Let's protect it together!

ROSES & THORNS

**ONCE UPON A TIME,
HUMANITY LOST PARADISE.
YOU ARE RECREATING IT!**

IT'S IN YOUR HANDS.

What makes a good rose/thorn glove?

The most important thing when pruning roses in spring is a sturdy leather glove with a cuff. This protects your hands and forearms from thorns while allowing maximum freedom of movement. This type of glove also provides perfect protection when pruning thorny plants or working with cacti. It is also bite-resistant.

For pruning roses, where you cut off the faded heads, a rose glove made of soft goatskin is perfect. However, an extended cuff is always helpful as good forearm protection.

What makes a good leather glove?

We have high quality standards when it comes to gardening gloves. Leather gloves must be soft, comfortable to wear, and skin-friendly. They are part of every gardener’s basic equipment.

What professionals particularly appreciate about leather gloves is that even if you spend the whole day cutting, you don’t get blisters.

A tip for drying leather gloves properly: Leather is a natural material and should not remain wet or damp for too long. It is best to dry the gloves upright at room temperature. Please note: Exposure to sunlight or artificial heat sources such as heaters or dryers will cause the leather to harden.

IT’S IN YOUR HANDS.

The modular GEBOL POS system.

Wall module guidance system:

- Good long-distance effect
- Division into work areas for easier orientation at the POS.
- Side information boards support purchasing decisions.

Available in various widths from 100 cm to 250 cm.

Our POS systems are delivered to you ready for sale and are the ideal addition to your existing range. We are happy to put together secondary placements tailored to your needs.

You choose the products you want—we deliver the display ready for sale. All you have to do then is position it in a high-traffic area. Look forward to numerous impulse purchases from your customers!

Place the display in a virtual world that blends seamlessly into your store.

1. Scan the QR code with your cell phone.
2. Press „Show in AR“ to unlock the world of augmented reality.
