**KNEE
PROTECTION**

THE CREATION OF OUR KNEE PADS

DEVELOPMENT

FROM PRACTICE, FOR PRACTICE

When developing our new range of knee protection products, we had one clear goal in mind:

maximum protection, high wearing comfort, and simple, logical product selection for the user.

DEVELOPMENT IN COLLABORATION WITH PROFESSIONALS

All models were tested in collaboration with floor layers, craftsmen, and specialist companies.

Their feedback on fit, slip resistance, strap guidance, and pressure distribution was directly incorporated into product optimization.

1 THE GROUND: HEAVY OR ALL-ROUND

Depending on the area of application, we distinguish between:

HEAVY – for hard, rough surfaces with high loads

ALLROUND – for changing areas of application and universal uses

This allows the knee pad to adapt perfectly to the respective working environment – from concrete to gravel.

2 THE PROTECTION LEVELS: LEVELS 0, 1, AND 2

Puncture and impact protection is divided into three classes in accordance with the standard:

LEVEL 0 – basic protection

LEVEL 1 – Increased protection for regular kneeling work

LEVEL 2 – Maximum protection for extreme conditions

This allows each user to choose exactly the level of protection that suits their everyday work.

3 OUR QUALITY PROMISE: ULTRA, PRO, CLASSIC

In addition, our knee pads differ in terms of features, material quality, and durability:

ULTRA – Premium materials, maximum comfort, and maximum durability

PRO – increased robustness and improved comfort

CLASSIC – Solid quality for regular use

ULTRA stands for our uncompromising professional solution. Tested by professionals – optimized for everyday use.

12 MODELS – CLEARLY STRUCTURED, SIMPLY PRESENTED

The result is a carefully curated selection of **12 knee pads** that:

- covers all relevant requirements
- provides clear guidance for the user
- and can be ideally presented on shelves, in modules, or on displays

„Developed from practical experience – for every challenge on your knees.“

ULTRA – MAXIMUM PERFORMANCE WITHOUT COMPROMISE

The **ULTRA** models are the top of the line in our knee protection range. They were developed for extreme requirements and combine **premium materials with maximum wearing comfort and maximum durability.**

The **ULTRA** models focus on:

- particularly durable outer materials
- high-quality upholstery and cushioning systems
- ergonomic design for long, fatigue-free working

ULTRA is the right choice for professionals who **refuse to compromise** and expect a product that delivers consistently high performance even under intensive daily use.

KNEE PAD U-300

DESCRIPTION

- pull loop for easy donning and adjustment
- robust textile fabric with shock-absorbing gel insert
- PP shell with TPR elements for extra grip and protection
- foldable thigh support for maximum stability
- extra wide elastic fastening straps with pull tab
- optimal grip for demanding applications
- power level: 2 / Type 1

PRO

PRO – DEVELOPED FOR PROFESSIONAL CONTINUOUS USE

The **PRO** models are designed for users who rely on their knee pads every day and work in demanding conditions. In this category, the focus is on **reliability, ergonomics, and durability**.

The **PRO** models focus on:

- reinforced materials
- optimized design
- even pressure distribution

The **PRO** models are aimed at **professional craftsmen and specialist companies** who need a product that delivers consistently high performance in daily use and impresses in the long term.

www.gebol.com

THE RIGHT SOLUTION FOR EVERYONE

- For professional users and DIY enthusiasts
- Compliant with all legal requirements
- The right product for every application

QUALITY WITHOUT COMPROMISE

- ISO 9001:2015 certified
- Quality control by international testing institutes
- Quality and compliance management inspects products and production processes on site.

FAST. RELIABLE.

- Delivery within 48 hours
- Efficient logistics processes
- Reliable shipping partners, Europe-wide

DESIGNED FOR REAL WORK

- Continuous product development
- Focus on application and product quality
- Innovative sales concepts and POS solutions

WERE THERE WHEN YOU NEEDED THEM

- High storage capacities
- Ready for shipping at any time

MORE THAN JUST PRODUCTS

- Support from our own employees
- Expert advice
- Support with placement and promotions

RESPONSIBILITY THAT WORKS

- ISO 14001:2015 certified environmental management
- Cardboard instead of plastic wherever possible
- Responsibility for people and the environment in production
- Focus on sustainable development

STRONG BRAND. STRONG TEAM.

- Groundbreaking, innovative corporate culture
- Health promotion programs
- Open, modern office concept with varied communal and open areas.
